

EESTI AKREDITEERIMISKESKUS

LISA Tartu Ülikooli Katsekoja
akrediteerimistunnistusele L151
*ANNEX to the accreditation certificate
No L151 of Testing Centre, University of Tartu*

1. Akrediteerimisulatus on toodud järgnevas tabelis:
Accreditation scope is given in the following table:

| nr No. | Katse/analüüs Test | Metoodika Procedure | Maatriks Matrix | Mõõteulatus Measurement range |
|-------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|--------------------------------------------------------------------------------|
| A. Keemiametroloogia labor <i>Laboratory of Metrology in Chemistry</i> | | | | |
| 1. | Lahustunud hapniku sisalduse mõõtmise hapniku analüsaatoriga <i>Measurement of dissolved oxygen content by oxygen analyser</i> | M107 baseerub standardil/ <i>is based on standard</i> EVS-EN ISO 5814:2012 | Vesi <i>Water</i> | (0,1...20) mg/l |
| 2. | Nitrotselluloosi baasil propellantide stabiilsuse testimine, kasutades stabilisaatorite ammendumist <i>Stability testing of nitrocellulose based propellants using stabilizer depletion</i> | M109 baseerub standardil / <i>is based on standard</i> AOP – 48 Ed. 2 Explosives, Nitrocellulose Based Propellants, Stability Test Procedures and Requirements Using Stabilizer Depletion | Nitrotselluloosi baasil propellandid <i>Nitrocellulose based propellants</i> | (0,05...1,5) % stabilisaatorit propellandis <i>stabilizer in propellant</i> |

| nr No. | Katse/analüüs <i>Test</i> | Metoodika <i>Procedure</i> | Maatriks <i>Matrix</i> | Mõõteulatus <i>Measurement range</i> |
|-----------|-----------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|
| 5. | Sisekliima parameetrite mõõtmine <i>Measurement of indoor environment parameters</i> | M303 baseerub standarditel/ is based on standards EVS-EN ISO 7726:2003 EVS-EN 15251:2007 | Õhutemperatuur siseruumides <i>Ambient air temperature</i> Suhteline õhuniiskus siseruumides <i>Relative humidity of ambient air</i> Õhu liikumiskiirus ruumis <i>Velocity of ambient air</i> | (10...40) °C (10...69,9) % (0,1 ... 2) m/s |
| 6. | Vibratsiooni mõõtmine <i>Measurement of mechanical vibration</i> | M304 baseerub standarditel/ is based on standards EVS- EN 14253:2004+A1:2007 EVS-EN ISO 5349-1:2002 EVS-EN ISO 5349-2:2001 EVS-ISO 2631-1:2002 ISO 2631-2:2003 ja juhenditel/ <i>and manuals</i> NT ACOU 082 NT ACOU 103 | Kohtvibratsioon, üldvibratsioon, hoone konstruktsioonide vibratsioon <i>Hand-arm vibration, whole-body vibration, vibration in building</i> | (0,306...5) m/s ² |
| 7. | Kunstliku valgustatuse mõõtmine <i>Measurement of artificial illuminance</i> | M305 baseerub standarditel/ is based on standards EVS 891:2008 EVS-EN 12464-1:2011 | Töökoha ja ruumide valgustatus <i>Illuminance of workplaces and surrounding areas</i> | (20...2000) lx |

| nr No. | Katse/analüüs Test | Metoodika Procedure | Maatriks Matrix | Mõõteulatus Measurement range |
|-------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| C. Meditsiiniseadmete labor <i>Laboratory of Medical Devices</i> | | | | |
| 10. | Diagnostiliste röntgenseadmete kvaliteedimõõdistamine <i>Quality control of diagnostic x-ray equipment</i> | M401 baseerub standarditel/is based on standards EVS-EN 60601-1:2006 (IEC 60601-1:2005) EVS-EN 60601-1-1:2002 (IEC 60601-1-1:2000) EVS-EN 60601-1-3:2008 (IEC 60601-1-3:2008) EVS-EN 60601-2-54:2009 (IEC 60601-2-54:2009) EVS-EN 60601-2-43:2010 (IEC 60601-2-43:2010) EVS-EN 61223-3-1:2002 (IEC 61223-3-1:1999) EVS-EN 61223-3-4:2002 (IEC 61223-3-4:2000) EVS-EN 61223-3-5:2004 (IEC 61223-3-5:2004) EVS-EN 60336:2005 (IEC 60336:2005) EVS-EN 61262-1:2006 (IEC 61262-1:1994) EVS-EN 61262-4:2006 (IEC 61262-4) EVS-EN 6061-2-65:2013 (IEC 60601-2-65:2012) IEC 60601-2-63:2012 | Statsionaarsed ja mobiilsed diagnostilised röntgenseadmed <i>Stationar and mobile diagnostic x-ray</i> | (20...150) kVp (0,0002...2000) mGy (0,0003...450) mGy/s (0,0001...10) s (0,1...1000) mAs |
| D. Tuumaspektroskoopia labor <i>Laboratory of Nuclear Spectroscopy</i> | | | | |
| 11. | Raadiumi isotoopide aktiivsuse kontsentratsioonide määramine vees gammaspektrometrilisel meetodil <i>Gammaspectrometrical Measurement for Determining the Activity Concentrations of Radium Isotopes in Water</i> | M601 | Vesi <i>Water</i> | MDA(Ra-226) = 15 mBq/kg MDA(Ra-228) = 25 mBq/kg MDA(Ra-224) = 20 mBq/kg (MDA – minimaalne detekteeritav aktiivsus/ <i>minimum detectable activity</i>) |
| 12. | Raadiumi isotoopide aktiivsuse kontsentratsiooni määramine vees vedeliktsintillatsioonmeetodil <i>Determination of Radium isotopes activity concentrations in water by liquid scintillation counting</i> | M602 | Vesi <i>Water</i> | LoD(Ra-226) = 10 mBq/kg; LoD(Ra-228) = 60 mBq/kg; (LoD – määramispiir, <i>limit of detection</i>) |

2. Asutuse juriidiline aadress: Ülikooli 18, Tartu

Legal address of company:

3. Labori aadressid:

Addresses of laboratory:

- | | |
|----------------------------------------------------------------------------|--------------------------------------------------|
| A. Keemiametroloogia labor: <i>Laboratory of Metrology in Chemistry</i> | Ravila 14A, 50411 Tartu |
| B. Töökeskkonnalabor: <i>Laboratory of Work Environment</i> | Nooruse 1, 50411 Tartu ja Ravila 19, 50411 Tartu |
| C. Meditsiiniseadmete labor: <i>Laboratory of Medical Devices</i> | Tähe 4, 51010 Tartu |
| D. Tuumaspektroskoopia labor <i>Laboratory of Nuclear Spectroscopy</i> | Riia 142, 51014 |

4. Katseprotokollidele vastutava isikuna allakirjutamise õigusega isikud

Next persons are authorized for signing the test reports and certificates

A keemiaalaste analüüside osas:

in the field of chemical analyses:

Koit Herodes, Viljar Pihl, Lauri Jalukse, Karin Kipper, Riin Rebane, Anneli Kruve, Signe Vahur, Olev Saks, Martin Vilbaste, Ivo Leito, Maarja-Liisa Oldekop

B töökeskkonna mõõtmistel:

in the field of occupational measurements:

Siim Kinnas, Ene Indermitte, Margit Oja, Andres Laur, Koit Herodes, Maarja-Liisa Oldekop

C diagnostiliste röntgenseadmete kvaliteedimõõdistamisel

in the field of quality control measurements of diagnostic X-ray equipment:

Kalle Kepler, Anatoli Vladimirov, Koit Herodes, Maarja-Liisa Oldekop

D raadiumisisalduse mõõtmistel

in the field of radium measurements are authorized the following persons:

Madis Kiisk, Siiri Suursoo, Kadri Isakar, Koit Herodes, Maarja-Liisa Oldekop

5. Labor on kohustatud:

The laboratory is obliged to:

- teatama viivitamatult akrediteerimisasutusele kõigist akrediteerimise suhtes olulistest muudatustest (organisatsiooni struktuur, juhtimine, personal, juhtimissüsteemi struktuur, olulised seadmed, akrediteerimisulatus, alltöövõtjad, protseduurid);

inform immediately the body granting accreditation of any changes bearing on its compliance with the accreditation requirements (organisation, management, personnel, management system structure, relevant equipment, scope of accreditation, subcontracting, procedures);

- järgima pidevalt standardi EVS-EN ISO/IEC 17025 nõudeid;
comply at all times with the requirements of standard EVS-EN ISO/IEC 17025;
- olema akrediteerimisasutuse järelevalve all ning vastu võtma ettenähtud sagedusega hindamisgrupi;
be under surveillance of the accreditation body and regularly enable the work of the surveillance visit team;
- viitama oma akrediteeritusele EAK J9 nõuete kohaselt.
refer to its accreditation according to the requirements of EAK J9.

Märkus: käesolev lisa asendab 06.02.2013välja antud lisa seoses uusakrediteerimisega.

Note: this annex replace the annex issued on 06.02.2013 in connection with reaccreditation.
